Preface	xi
Acknowledgements	xiii
Contributor biographies	xv
1 An overview of the chemistry, manufacture, environmental fate and detection of carbofuran	1
<i>Stephen Donovan, Mark Taggart, Ngaio Richards</i>	
1.1 Introduction	1
1.2 The chemistry and mode of action of carbofuran	1
1.3 Manufacture and formulation of carbofuran	4
1.4 Carbofuran in the environment	5
1.4.1 Carbofuran precursors, metabolism and degradation products	6
1.5 Analytical methods used to detect carbofuran	8
1.5.1 Principles of chromatography	8
1.6 Conclusions	17
Acknowledgements	17
References	17
2 Carbofuran: Toxicity, diagnosing poisoning and rehabilitation of poisoned birds	19
<i>Pierre Mineau, Stuart Porter, Carol Uphoff Meteyer</i>	
2.1 Acute toxicity of carbofuran to birds and mammals	19
2.2 Exposure routes for the liquid formulation	22
2.3 Exposure routes for granular carbofuran formulations	23
2.3.1 Direct ingestion	23
2.3.2 Contaminated soil invertebrates	25
2.3.3 Contaminated soil/sediments	26
2.4 The time course of carbofuran intoxication	26
2.5 Physiological effects and signs of intoxication	27
2.6 Physical field evidence and necropsy findings in poisonings due to AChE inhibiting compounds with special emphasis on carbofuran	28
2.7 Chemical and biochemical diagnosis of a carbofuran kill	31
2.8 Rehabilitation of poisoned wildlife	33
2.9 Conclusion	34
Acknowledgements	34
References	34

3 A chronicling of long-standing carbofuran use and its menace to wildlife in Kenya	39
3.1 Introduction	39
<i>Joseph O. Lalah, Peter O. Otieno, Ngaio Richards</i>	
3.2 Background on pesticide use and environmental monitoring in Kenya	43
<i>Joseph O. Lalah and Peter O. Otieno</i>	
3.2.1 Furadan use in rice farming: how carbofuran first gained entry into Kenya	43
3.2.2 Presence, persistence and degradation of carbofuran in Kenyan soils	46
3.2.3 General purchase and application of pesticides	48
3.2.4 General trends in use of pesticides in agricultural communities	49
3.3 Measuring the conservation threat that deliberate poisoning poses to birds in Kenya: The case of pesticide hunting with Furadan in the Bunyala Rice Irrigation Scheme	53
<i>Martin Odino</i>	
3.3.1 Introduction	53
3.3.2 Methodology	54
3.3.3 Results of the study	57
3.3.4 Discussion	67
3.3.5 General conclusions	69
3.4 The role of carbofuran in the decline of lions and other carnivores in Kenya	70
<i>Laurence Frank, Alayne Cotterill, Stephanie Dolrenny, Leela Hazzah</i>	
3.4.1 Background information	70
3.4.2 Use of poison to kill carnivores in Kenya	71
3.4.3 Methods used to assess repercussions to scavenging mammals	71
3.4.4 Results	72
3.4.5 Discussion	74
3.5 Threats of secondary Furadan poisoning to scavengers, especially vultures, in Kenya	74
<i>Darcy Ogada</i>	
3.5.1 Misuse of Furadan to control farm pests	74
3.5.2 Effects of Furadan on vulture populations in Kenya	75
3.6 Forensic analysis of carbofuran in vultures and environmental samples collected from Laikipia and Isiolo districts	77
<i>Peter Otieno, Joseph O. Lalah, Munir Z. Virani</i>	
3.6.1 Survey result	78
3.6.2 Analysis of environmental sample	78
3.6.3 Conclusions of the study	81
3.7 Repercussions of pesticides (including carbofuran) on nontarget, beneficial insects and use of insects in forensic analyses in Kenya	81
<i>Dino J. Martins</i>	
3.7.1 Studies on nontarget insects	81
3.7.2 Overview of insect diversity and abundance at a mammalian carcass: the use of insects in upcoming forensic investigations in Kenya	82

3.8 Analytical, legal and regulatory mechanisms in Kenya <i>Joseph O. Lalah and Peter O. Otieno</i>	84
3.8.1 Analytical methodology required and research capacity available in Kenya	84
3.8.2 Legislation and regulation of pesticides in Kenya	85
3.9 General conclusions on carbofuran use, misuse and monitoring in Kenya <i>Joseph Lalah and Peter Otieno</i>	87
Acknowledgements	90
References	91
4 Mitigating human-wildlife conflict and retaliatory poisonings in India to preserve biodiversity and maintain sustainable livelihoods	99
<i>Venkataramanan, R. and Sreekumar, C.</i>	
4.1 Introduction	99
4.2 Conservation measures and human-wildlife conflicts	100
4.3 Types of human-wildlife conflict	101
4.4 Regulation and management of human-wildlife conflict	105
4.5 Use of carbofuran in India	109
4.6 Use of carbofuran in relation to other compounds	110
4.7 Diagnosing carbofuran poisoning in India	110
4.8 Forensic facilities and analyses in India	112
4.9 Case studies: use of carbofuran for poisoning in relation to other compounds	113
4.9.1 Accidental exposure	113
4.9.2 Misuse of carbofuran	115
4.9.3 Deliberate poisoning using carbofuran and other compounds	116
4.10 Potential short and long-term solutions	121
4.10.1 Alternatives to carbofuran	121
4.10.2 Should carbofuran be banned in India?	122
4.11 Mitigation of human-wildlife conflicts	123
4.11.1 Habitat conservation	123
4.11.2 Community-based solutions	125
4.11.3 Compensation for loss of property	125
4.12 Conclusion	127
Acknowledgements	128
References	128
5 Regulation of carbofuran and its use to poison wildlife in the European Union and the rest of Europe	132
5.1 Introduction	132
5.2 Intentional poisoning of piscivorous species and other wildlife with carbofuran in the Czech Republic <i>Lukáš Poledník, Kateřina Poledníková, Jitka Větrovcová, Václav Hlaváč</i>	135
5.2.1 Introduction	136
5.2.2 Poisoning of wildlife by carbofuran and its detection within the Czech Republic	136

5.2.3 Legal and institutional framework against wildlife poisoning in the Czech Republic	138
5.3 Persecution and poisoning of birds of prey in the Netherlands <i>Hugh Jansman, Peter van Tulden</i>	139
5.3.1 Introduction	139
5.3.2 The scale of carbofuran use to poison wildlife, especially birds of prey, in the Netherlands	140
5.3.3 Detection of carbofuran and other compounds in wildlife carcasses	142
5.3.4 Recommendations	142
5.4 Initiatives underway to protect wildlife from carbofuran poisoning in Austria <i>Christian Pichler, Hermann Ammer</i>	144
5.4.1 Introduction	143
5.4.2 Initiatives underway to generate awareness, about, and monitor incidents of, carbofuran-related wildlife mortality in Austria	144
5.4.3 Toxicological analysis of wildlife carcasses in Austria	146
5.4.4 Conclusions	146
5.5 Use of specialised canine units to detect poisoned baits and recover forensic evidence in Andalucía (Southern Spain) <i>Iñigo Fajardo, Antonio Ruiz, Irene Zorrilla, Antonio Valero, Isabel Fernández, Ernesto Sáez, F.M. Molino, Jesús Olivares</i>	147
5.5.1 Introduction	147
5.5.2 Integration of canine units in the anti-poisoning strategy of the Government of Andalucía	149
5.5.3 Use of forensic procedures and techniques in the field and the laboratory	151
5.5.4 Conclusions	155
5.6 Sociopolitical and rural influences on the management and monitoring of carbofuran and its use to poison wildlife in Hungary <i>Péter Bedő</i>	155
5.6.1 Introduction	155
5.6.2 Incidents of carbofuran-related wildlife mortality in Hungary	156
5.6.3 Analysis of wildlife samples for poisons and other incidents of poisoning in Hungary	156
5.6.4 Conclusions	157
5.7 Leisure-based human-wildlife conflicts arising from the introduction of game species and repercussions to vultures across Croatia <i>Gordana Pavokovic</i>	157
5.7.1 Introduction	157
5.7.2 Past registration and current use in Croatia	160
5.7.3 The use of carbofuran as a poison in relation to other compounds in Croatia	160
5.7.4 Threats to biodiversity, livelihoods and tourism on the Croatian islands	164

5.7.5 Nature protection and analytical capacity in Croatia	167
5.7.6 Recommended steps to address the current threat posed by carbofuran	168
Acknowledgements	169
References	169
6 Perspectives on wildlife poisoning by carbofuran in the United Kingdom and Republic of Ireland – with a particular focus on Scotland	171
6.1 An overview of the registration and withdrawal of carbofuran products	171
6.2 An overview of human-wildlife conflicts in the UK and ROI	173
6.3 The effect of carbofuran poisoning and other illegal persecution methods on raptor populations in Scotland <i>Ruth E. Tingay</i>	174
6.4 A landowner's perspective on wildlife poisoning in Scotland <i>Douglas McAdam</i>	178
6.5 Monitoring carbofuran abuse in Scotland <i>Michael J. Taylor</i>	181
6.5.1 Introduction	181
6.5.2 The impact of carbofuran abuse in Scotland	182
6.5.3 Analytical methodology and recent developments	183
6.5.4 Conclusion and discussion	185
Acknowledgements	187
References	187
7 A Latin American perspective: the environmental impact of farming wheat and rice treated with carbofuran and Rhodamine B on Brazilian wild birds	189
<i>Alexandre de Almeida and Álvaro Fernando de Almeida</i>	
7.1 Introduction	189
7.2 Materials and methods	192
7.3 Results and discussion: biological aspects of the environmental impact caused by carbofuran and Rhodamine B on Brazilian wild birds	195
7.3.1 Alternatives and mitigation	200
7.3.2 Avian mortality and some aspects that influence this estimate	201
Acknowledgements	204
References	204
8 Impacts of carbofuran on birds in Canada and the United States	208
<i>Pierre Mineau, Linda Lyon, Stella McMillin</i>	
8.1 Introduction and short registration history of carbofuran in North America	208
8.2 Impacts from the sandcore (silica) granular formulations	210
8.2.1 Supervised field trials and surveillance exercises	210
8.2.2 Reported incidents where the product was applied according to label directions	214

8.3	Impacts from the corncob granular formulation	222
8.3.1	Supervised field trials	223
8.3.2	Reported incidents	224
8.4	Impacts from the flowable (liquid) formulation	225
8.4.1	Industry-supervised field trials	227
8.4.2	Field studies of carbofuran used as a grasshopper insecticide	230
8.4.3	Monitoring programmes in US cotton	234
8.4.4	Incidents	235
8.5	Evidence for secondary poisoning impacts with any formulation type	241
8.6	Impacts resulting from abuse cases regardless of formulation	242
8.7	Conclusions	243
	Acknowledgements	243
	References	244
9	Conclusions, recommendations and the way forward	251
	<i>Ngaio Richards</i>	
9.1	Wildlife mortality stemming from intentional misuse and legal/labelled use of carbofuran	251
9.2	Overall recommendations and the way forward	253
9.2.1	Address and mitigate the root causes of human-wildlife conflict	253
9.2.2	Increase grassroots educational initiatives	254
9.2.3	Enhance analytical capacity and increase sampling, testing and monitoring efforts	254
9.2.4	Conduct studies in critical but currently under-represented subjects	255
9.2.5	Coordinate international monitoring and conservation efforts	256
9.2.6	Address outstanding policy and accountability issues	256
